The Third International Workshop on Knowledge Extraction and Semantic Annotation

KESA 2017

April 23 - 27, 2017 - Venice, Italy

<http://www.aria.org/conferences2017/KESA.html>

Important deadlines:

Submission (full paper)	December 5, 2016
Notification	February 20, 2017
Registration	March 5, 2017
Camera ready	March 15, 2017

Topics:

- Shallow Parsing & Knowledge Extraction
- Knowledge Discovery and Ontology Learning from unstructured sources
- Knowledge Extraction based on (Linguistic) Linked Open Data
- Data and text mining on (un)structured knowledge bases
- Large-scale information extraction
- Models for ontology engineering and resource integration
- Tools in aid of NLP tasks and application
- Machine learning for natural language
- Semantic role labelling
- Semantic search
- Semantic Representation and Knowledge Acquisition
- Cognitive, mathematical and computational models of language processing
- Languages, methodologies and tools for representing and managing semantic annotations
- Deep Language Processing
- Linguistic and NLP Ontologies
- Analysis of Ontology Models for Natural Language Texts
