We propose an interdisciplinary session, involving various experts such as bioengineers, physicians, and neurologists. Parkinson 's Disease, after Alzheimer 's Disease, is the most common neurodegenerative disease, with an estimated population of at least 6 millions of patients in Western Europe and in the ten most populous nations. This estimation is expected to duplicate by 2030. Consequently, there is an urgent need of low costs solutions increasing quality of healthcare. In the proposed traks, we intend to discuss about new solutions for the diagnostic and a neurorehabilitative approach.

Prospective authors are invited to submit original papers on topics including, but not limited to:
- Parkinson's Disease
- Neurology
- Neurorehabilitation
- Telemedicine
