This special track aims at the development of Financial Information Systems. It is intended to provide a high-quality platform for researchers and practitioners to present their latest theoretical and practical research with applications in this area. Original papers are solicited in all areas of research related to Financial Information Systems.

The scope of the WFIS includes, but not limited to financial reporting, continuous auditing, financial information systems – technology and management, business intelligence for financial data, data recovery, artificial intelligence, machine learning and deep learning and data science over financial data, blockchain over financial data. The contributions might include algorithms, modeling, applications, security issues, and tools to meet the current customer requirements of financial environments.

The WFIS invites the authors to submit their research articles that explore design, development, applications, and financial tools. Papers should be original and contain contributions of theoretical or experimental nature or be unique experience reports.

### **Topics include, but not limited to:**

- Financial Information systems, technology and management
- Information systems, technology and management for Continuous Auditing
- Financial Information assurance
- Financial Information retrieval
- Online analytical processing technology for Financial Data
- Data mining and data warehousing for Financial Data
- Networks and application
- Web technology and development for Financial Data
- Mobile technology and development for Financial Data
- Security, privacy, and usability of Financial Data
- Blockchain over Financial and/or Audit Data
