October 27, 2019 to October 31, 2019 - Nice, France

Today, lot of data and Information is generated and available at different places. The data may be available in many formats such as text, image, audio and video. The challenge is to retrieve meaningful information and use it for commercial purpose. The use of data for welfare of human being is another perspective. Information requires traveling through heterogeneous network. Therefore maintaining the security and integrity of data is also a challenge. Researchers are working to find the way to handle and secure the tremendous amount of data and Information.

The main objectives of this track are:

- ✓ To explore the milestone of Data analysis and Information processing.
- ✓ To find the standards and present solutions for the development of tools for handling the big data generated by various computing devices that can support ethical use of this data.
- ✓ To explore the current Information security and Testing challenges.
- ✓ To present the advances in different Imaging techniques for disease detection.

Topics include, but not limited to:

- Big Data Analysis
- Big Data Interpretation
- Data Testing
- Information Security
- Information Forensic
- Medical Image processing
- Data and Image Processing for Human Welfare
