Recent years have seen a significant rise in the amount of software that is developed in a global fashion (with teams distributed by location, time, language and culture). The teaching of software engineering needs to be adapted and updated to better match the needs of Global Software Engineering (GSE) in industry.

This special track will be concerned with experience reports, experimental research and learning theory/models directly related to the question of how to improve the practice of teaching GSE.

Topics include, but not limited to:

- 1) Best practices for GSEE
- 2) Tool support for GSEE - collaborative working environments, virtualization, simulation
- 3) Agile methods and team work
- 4) Industrial participation
- 5) Online collaborative learning support
- 6) Assessment and Impact
- 7) Serious Games
