CSNC 2019, The Fourteenth International Conference on Systems and Networks Communications
<https://www.iaria.org/conferences2019/ICSNC19.html>
November 24, 2019 to November 28, 2019 - Valencia, Spain

Trust management systems have attracted great attention in recent years. They are active topics of many discussions and research societies in theoretical and application levels. There are several challenges when dealing with trust in term of quantification and modeling. As a result, many researchers have proposed their modeling schemes depending on the context.

Trust notion has become an important element of different areas and applications such as access control, internet of things, online social networks, big data, decision-making, negotiation systems, cybersecurity, and so on.

The aim of this special track is to provide the opportunities for international investigators to present and share their recent works discussing the new challenges, research ideas and innovative solutions of trust management systems and applications.

Topics include, but not limited to:

- Trust modeling and management;
- Trust-based access control;
- Trust management in internet of things;
- Trust management and big data;
- Trust in online social networks;
- Trust-based collaborative decision-making;
- Trust management for securing negotiation systems;
- Trust integration in decision support systems;
- Trust and cybersecurity.
