The traditional learning environment is extended and expanded to a Planetary Community where learners can interact and collaborate. In this newly emerged learning community, learning can be interpersonal or it can be intercultural. It can be mono-cultural, or it can be cross bordered and cross-cultural. The size of the participants may vary greatly from just a sender and a receiver, to a sender and massive receivers, as is seen in MOOCs (Massive Open Online Course). The form and nature of communication vary. However, as a common denominator, by integrating new technologies, we can transcend time and space. Communication can become more active and more dynamic. In this session, we will deal with various kinds of digital communications using media.

The goal of DICOM is to explore various types of digital communications for teaching and learning, and help to design effective instructional designs. Possible contributions may include research, pedagogical practices, and learning experiences.

The topics encompass, but not limited to:

- Distance education
- MOOCs (Massive Open Online Courses)
- OER (Open Educational Resources)
- Online video conferencing
- SNeS, Games, Quizzes, Online videos, Interaction, Collaboration,
- Chat, Smartphone, Media Communication,
- Language learning, Active learning, Informal learning, Mobile learning, Language varieties, World Englishes, Sociolinguistics
