July 18, 2021 to July 22, 2021 - Nice, France

Computer vision and data visualization have been put to practical use in a variety of fields. Analyzing human work patterns is highly expected to further improve work efficiency and safety. This special track invites best practices in the practical use of behavior analysis in human-computer interaction. The range of topics will include research on interactive user interfaces, pose estimation, hand tracking, 3D simulation, anomaly detection, and more.

Topics include, but not limited to

- Behavior analysis
- Body motion and gesture analysis
- Tactile sensors and application
- 3D VR simulation
- Special applications (new interfaces, assistive robotics, etc.)
