About the **Brazilian Data** Protection Regulation

Law 13.709/ 2018 Based on GDPR – European Sanctioned in 2018, august Validity since 2020, September Sanctions since 2021, august

The General Data Protection Law (LGPD) imposes rules for the treatment of personal data by companies throughout Brazil, without mentioning differences in the dealings of small, medium, large companies or self-employed professionals

It is clear to establish equal guidelines for all figures

The Brazilian SMEs

SME is an acronym for Small and Medium Enterprise

It is used to classify the size of a company in function of its number of employees and its annual income

Classifications according to the number of workers employed

Industry

- Microenterprise up to 19 employees
- Small Business from 20 to 99 employees
- Medium Company from 100 to 499 employees

- Microenterprise up to 9 employees
- Small Business 10 to 49 employees
- Medium Company 50 to 99 employees
- Large Company more than 100 employees

Large Company - 500 or more employees

Trade and Services

Classification by billing

Individual Microentrepreneur: Annual turnover up to USD 14.000

Microenterprise:

Annual turnover up to USD 66.000

Small Business:

Annual turnover between USD 1.980 and USD 828.000

Small Farmer:

Property with up to 4 fiscal modules or annual sales of up to USD 828.000

1,000

The economic Strenght of SMEs

19 million companyes in Brazil

7.5 million are SMEs

Toghether, the SMEs account for 29% of GDK – Gross Domestic

Products in Brazil Market

The Challenge

- It is neither easy nor cheap to adapting to the LGPD
- The companies need to structure themselves to have the budget and human resources to put into practice everything required by the Law
- Is a hard work for the SMEs , not only due to lack of investment, but also for lack of information
- The law requires a DPO figure in all companies

How to achieve the compliance?

According to the law:

- Adopting technical and administrative measures to maintain the security and confidentiality of information
- Defining a governance plan and applying good practices in order to protect and maintain the security of all personal data involved in business flows and/or processes

ISO 27000 family of standards comes into play

- Adress cibersecurity
- Brings a clarity on business process structure

Escalation to compliance

From risk definition to business continuity and response plan, the ISO 27000 family provides a robust framework, and offers a guidance related on:

- How to identify risks related to the processing of personal data
- Reinforce the need for policies
- Internal and external contractual agreements

Items that are unknown to most small and medium-sized companies

The biggest cost is

the non-investment in information security

90% of intrusions are directed to the systems of small and medium-sized companies

Conclusion

The ISO 27000 Family standards can helps small and mid-sized companyes to achieve their compliance with the Data Protection Regulations not only in Brazil, but in the world, while helps these business to improve their information security
