

- Article title: Development of Urine Monitoring Sensor Module with Wireless Transmission Function

- Article authors : Lan Zhang, Jian Lu, Sohei Matsumoto

Presenter's name and affiliation : Lan Zhang, National Institute of Advanced Industrial Science and Technology (AIST), Tsukuba, Japan

- Presenter's email address : chou-ran@aist.go.jp

Lan Zhang received his Ph.D. degree in mechanical engineering from University of Nagoya in 2012. From 2012.4, he worked in National Institute of Advanced Industrial Science and Technology (AIST), Japan as a postdoctoral researcher. He is currently a senior researcher in Device Technology Research Institute, AIST. His research interests include RF MEMS devices, piezoresistive MEMS devices, low-frequency power harvesting devices and health monitoring MEMS devices.
