

Dr. Abdulrahman Yarali is currently an associate professor in Industrial and Engineering Technology at Murray State University, Murray, KY, USA. He obtained his BS, MS and PH.D degrees in EE in the USA from UF, GWU and VPI&SU in 1986, 1988 and 1995 respectively. He has also practiced industrial engineering for over 10 years as technical advisor with several wireless service providers and vendors such as Nortel, and at&t. Dr. yarali has led research teams working on location completing numerous contracts in wireless mobile design and optimization in 2G, and 3G systems for leading telecommunications companies in the U.S.

He has been with Murray State University since 2003 where he has developed wireless program and courses for undergraduate and graduate levels. His primary research focus has been on higher generation of wireless access technologies and satellite communication applications and services. He has been awarded as the best professor of the year (2009) at Murray State University. Dr. Yarali has published books, abstracts and papers in technical journals and at national and international conferences. He has presented his papers and scholarly works in North America, Asia, Middle East, Europe and Australia in IEEE conferences, IARIA and many other prestigious conferences. He has supported IARIA for a number of years and has produced and presented articles for the several conferences. He has also actively been involved in technical, advisory, steering committees in many conferences including IARIA conferences.
