

Dr. Irina Astrova

*Senior Researcher
Institute of Cybernetics
Tallinn University of Technology
Tallinn, Estonia*

She received her MSc and PhD degrees in Computer Science from Tallinn University of Technology (Estonia) in 2008 and 2013, respectively. Here her focus areas were database management systems. Currently, her research areas include service-oriented architectures, cloud and mobile computing.

She is the author of more than 50 papers presented at international conferences, including IEEE, ACM and IARIA.

She has been involved with IARIA since IARIA SERVICE COMPUTATION 2009, *The First International Conferences on Advanced Service Computing*, where she received a Best Paper award for her paper “Mainframe Application Modernization Based on Service-Oriented Architecture.” Since then she regularly presents at IARIA SERVICE COMPUTATION, CLOUD COMPUTING and WEB conferences and publishes at IARIA journals. Furthermore, she serves as an IARIA Advisory Chair and IARIA Technical Program Committee member to support IARIA’s open-minded work.
