

Joakim Karlsen is an associate professor at the Faculty of Computer Science, Engineering and Economics at Østfold University College where he teaches communication- and technology design. He researches emerging media production practices for online- and mobile media platforms, and has recently studied science communication in archaeology, museum education in schools, computational journalism in newsrooms, independent transmedia documentary production and hackathons organized for media workers to learn more about digital design. From 1994 to 2000 he worked with documentary film and video production as director and editor, and several of the films he has worked on has been screened on national television in Norway. In 2019 he produced www.gjellestadstory.com, an online exhibit of the recently discovered Viking ship and its historical surroundings.

- Karlsen is a member of the [DigiTech](#) research group associated with Digital Society, a research priority area at Høgskolen University College [The Digital Society](#).
- He is work package leader in the RCN funded [pARTicipED](#) - researching the use of design thinking in developing collaborative projects between schools and museums in the cultural schoolbag.
- He is currently supervising 4 PhD projects in technology design, with focus on democratizing design processes.

Since 2016, he has been contributing to IARIA and the conference ACHI - Advances in Computer-Human Interactions. In 2016 he presented the paper: “Probing Privacy in Practice: Privacy Regulation and Instant Sharing of Video in Social Media when Running”. He reported on an examination of privacy aspects of live video sharing on social media, using a technology probe. In 2023 and 2024 has co-chaired and contributed to a special track ACHI-COCREATE, where he has invited researchers to present and theorize on design practices for co-creation and learning in the context of the digital society.
