

Hans-Werner Sehring

Hans-Werner Sehring works on software solutions for digital communication and collaboration. He is with Tallence.

Tallence AG is a technology and consulting agency that supports clients in using digitization to their advantage and to create competitive advantages. Hans-Werner is responsible for the business area of digital communication between clients and the users of their services.

Previous to his industrial career, Hans-Werner worked as a researcher and lecturer at the Hamburg University of Technology and at Hamburg's technology transfer institution, TuTech. He did research, published, and lectured in the areas of software engineering, software architecture, and model-driven software development, in particular for data-intensive information systems, content management systems, e-learning environments, and mobile solutions.

Hans-Werner studied computer science at the universities of Passau and Hamburg, Germany. He received his doctoral degree from Hamburg University of Technology.

He is engaged in IARIA activities since his visit of the First International Conference on Creative Content Technologies (CONTENT 2009). Since then, Hans-Werner contributed papers, moderated panels on the conferences of the ComputationWorld series, delivered keynote speeches, and was on the technical program committee for several times. He serves as a steering committee member of the CONTENT conference series. For the IARIA International Journal on Advances in Intelligent Systems, he acts as the editor-in-chief.

Hans-Werner became IARIA fellow in 2012. He supports and promotes the open-minded work of IARIA.
