

Jaromír Mastík

Jaromír is the leader of technical support in MICRORISC s.r.o. company since 2007. He helps developers and technicians with problems during development of their wireless application using IQRF®.

He examines and tests products of IQRF Alliance members to see if they meet the IQRF® Interoperability standard and then certifies them.

He has participated in several technical projects, some funded by state and European funds.

He studied electrical engineering with specialization on microelectronics.

Projects

- FI-IM4/034 Smart platform for wireless communication (2007-2010, MPO/FI)
- FR-TI1/058 Intelligent house-open platform (2009-2012, MPO/FR)
- FR-TI3/254 Open platform for telemetry (2011-2014, MPO/FR)
- FR-TI3/275 Open platform for smart cities (2011-2014, MPO/FR)
- FV-40303 Communication infrastructure for battery powered devices (2018-2021, MPO/FV)
