

Karsten Böhm is a research professor on Business Informatics at the University of Applied Sciences in Kufstein Tirol, Austria. He studies Computer Science with a minor in Linguistics and a specialization in automatic text processing. Karsten had been the director of studies of several academic programs in Kufstein for more than a decade and serves as an advisor for accreditation agencies in Austria and Germany. In his research activities he had been involved in European, national and regional collaborative research projects, where he served as researcher and as technical manager. His research is rooted in the field of IT-supported Knowledge Management with different fields of application, such as Innovation Management and knowledge intensive process management. His recent research focus is the use of semantic technologies and agile methods in higher education institutions.
