## BIOGRAPHY

László Tóth entered academia after 20 years of industrial experience. During his years in the industry, he has been involved in the development and operation of many enterprise systems as a system engineer and system analyst. He has also experience in building and operating computer networks and in the implementation of information security in enterprise environments.

He started his higher education in 1998 as a student at the University of Szeged and graduated as a programmer mathematician in 2001. During his years in the industry and public administration, he has gained a number of professional and IT qualifications that have supported him in his current work as a systems engineer or designer. Such qualifications and training courses include Computer Programmer, Chartered Accountant, Social Security, and Payroll Specialist, Public Administration Foundation and Specialist Examination, ITILv3 Foundation, TFS, CMMI, SCRUM training, and PO training.

He started his academic career in 2017, working as a departmental engineer, researcher, and lecturer at the University of Szeged. His industrial projects focus on artificial intelligence, machine learning, natural language processing, and cybersecurity. He has since successfully completed his Ph.D. studies, which he started in 2018, and is currently defending his dissertation.

László Tóth is married, he is the father of two adult children.
