

## **MARCIN BAJER**

Marcin Bajer was born in 1984 in Krakow, Poland. In 2008, he received a Master's Degree from the University of Science and Technology in Krakow in the field of Computer Control Systems. Before the graduation, he studied for one semester at the Karel de Grote-Hogeschool, Antwerp, Belgium, where he concluded the experimental part of his master's thesis - *Control Systems Integration using OPC Standard*. In 2013, he finished postgraduate studies at the Jagiellonian University of Krakow in the field of Mobile Devices Programming.

Since 2006 he has worked at numerous positions in ABB Corporate Research in Krakow. Between 2006 and 2015 he was involved in the development of industrial automation devices - mostly in the field of electric motors control and diagnostics. Since 2016, he is a member of the team responsible for smart building products. His main area of expertise is related to programming and testing embedded devices. His research interests also cover industrial communication protocols, Linux kernel, and mobile technology.

He is an author of multiple publications and patents. He was involved in the organization of numerous conferences as a member of the technical community, track chair, or keynote speaker. On behalf of ABB Corporate Research Center, he has participated in various academic-industry collaboration projects, innovation and entrepreneurship events as well as multiple other scientific dissemination activities.
