

Dr. Narito Kurata

Dr. Narito Kurata is a Professor in the Faculty of Industrial Technology, Tsukuba University of Technology, Japan since 2014. He received a Bachelor degree in Architectural Engineering from Waseda University in 1984, a Master degree in Structural Engineering from University of Tokyo in 1986, and a PhD in Structural Engineering from University of Tokyo in 2000. From 1986 to 2013, he worked as a researcher at the Technical Research Institute of Kajima Corporation. He has published numerous

articles in structural and earthquake engineering areas including structural control, structural health monitoring, wireless networked sensing and autonomous time synchronization sensing. His research interests are focused on novel sensor development and data analysis for smart building and city. He serves as chair for committee on information system technology and committee on smart monitoring of architecture and building in Architectural Institute of Japan (AIJ), and for smart sensing system committee in the Society of Instrument and Control Engineers (SICE). He was involved in the organization of numerous conferences as a member of the technical community, track chair, or keynote speaker.
