Content

The topic suggested by the track can be discussed in term of concepts, state of the art, research, standards, implementations, running experiments, applications, and industrial case studies. Authors are invited to submit complete unpublished papers, which are not under review in any other conference or journal in the following, but not limited to, topic areas.

Where is the edge between artificial intelligence and human beings?)
Such prospect warrants a reflection on the modus operandi of the intelligent systems:
Could be robots smartest that people? Could be robots an extension of our brains?
