### Registration

Each accepted paper needs at least one full registration, before the camera-ready manuscript can be included in the proceedings.

Registration fees are available at <http://www.iaia.org/registration.html>

### Content

The topic suggested by the track can be discussed in term of concepts, state of the art, research, standards, implementations, running experiments, applications, and industrial case studies. Authors are invited to submit complete unpublished papers, which are not under review in any other conference or journal in the following, but not limited to, topic areas:

- Industrial trends related to the semantic technologies usage and Open Data
- Enterprise information systems using semantic technologies
- Applications of semantic technologies in specific industrial domains
- Data base integration and federation using semantic technologies
- Interoperability using semantic technologies
- Semantic metadata and ontologies for Big Data
- Scalability of semantic methods and tools
- Semantic representation of process and processing
- Applications of semantics for stream processing and other data driven processing
