Special track

CSCPS: Cyber Security for Cyber and Physical Systems

Chair and Coordinator

Dr. Jin Wei Kocsis, The University of Akron, USA

jwei1@uakron.edu

along with

CENICS 2017, September 10 - 14, 2017 - Rome, Italy

The Tenth International Conference on Advances in Circuits, Electronics and Micro-electronics

<http://www.iaria.org/conferences2017/CENICS17.html>

The new CSCPS track on welcomes submissions that make significant contributions in cyber security for cyber and physical systems such as smart grids and intelligent transportation systems. The topics include, but are not limited to, secure and resilient communication and computation architectures, cryptography, key management, authorization and access control, security threat and vulnerability assessment and measurement, cyber-physical security information and event management, trust and privacy, security design and verification tools, and simulation and performance analysis of security operations and services.

Technological advances in all these areas have profoundly affected the realization of the resilient and secure communications and computation that are essential to all aspects of the cyber physical systems.

Topics include, but not limited to

- Secure and resilient communication and computation architectures
- Security threat and vulnerability assessment and measurement
- Cryptography, key management, authorization and access control
- Cyber-physical security information and event management
- Trust and privacy
- Security design and verification tools
- Simulation and performance analysis of security operations and services
