along with
SOTICS 2018, The Eighth International Conference on Social Media Technologies, Communication, and Informatics
October 14, 2018 to October 18, 2018 - Nice, France

The online social media encourage users to publish posts and share their opinions on the Web openly. In many cases, the authors of the posts are not required to verify the authenticity of the content created. This phenomenon has led to the issue of spreading fake news, propaganda, and disinformation. These three issues are growing problems on the Web. False or misleading information that has not been verified by trustful sources and could not be substantiated by facts are often virally circulated on the online social media giving an impression of authenticity, and sometimes leads to undesirable consequences.

In this special track, we welcome participants to submit papers that consider the issue of circulation of fake news, propaganda, and disinformation on the online social media.

The issue should relate to any of the following topics, but not limited to:

- Fake News
- Propaganda
- Disinformation
- Clickbait Detection
- Online Social Discussion
- Machine Learning
- Deep Learning
- Network Analysis
- Link Prediction
