UBICOMM 2018, The Twelfth International Conference on Mobile Ubiquitous Computing, Systems, Services and Technologies

<http://www.iaria.org/conferences2018/UBICOMM18.html>

November 18 - 22, 2018 - Athens, Greece

Telematics is an area that joins the telecommunication with informatics. We know about use of techniques of this area for solving real problems involving the areas like education, medicine, engineering, etc. However, scientific events do not consider this works as contributions and they leave them out of side of the scientific community.

This way, we consider very important to show the results of this works, formatted scientifically, but showing how the techniques and technologies of telecommunications and informatics have helped related areas to solve theirs problems.

The topics of interest include, but are not limited to:

- Applications in education - infrastructure, applications
- Applications in education - integration of ready solutions
- Applications for broadcasting social and cultural values
- Augmented Reality in the teaching
- Solutions for inspection - environmental issues
