

ramelCall for Contributions

Submission:

1. **Inform the Chair:** with the Title of your Contribution

2. **Submission URL:**

<https://www.iariasubmit.org/conferences/submit/newcontribution.php?event=DBKDA+2019+Special>

Please select Track Preference as **GraphSM**

Special track

GraphSM: Large-scale Graph Analysis, Management and Applications

Chairs and Coordinators:

Andreas Schmidt, Karlsruhe Institute of Technology / University of Applied Sciences Karlsruhe, Germany

andreas.schmidt@kit.edu

Iztok Savnik, Jožef Stefan Institute, Slovenia

iztok.savnik@ijs.si

along with

DBKDA 2019,

The Eleventh International Conference on Advances in Databases, Knowledge, and Data Applications

June 2 - 6, 2019 - Athens, Greece

<http://www.aria.org/conferences2019/DBKDA19.html>

There exists a growing interest to gather, store and query data from various aspects of human knowledge including geographical data; data about various aspects of human activities like music, literature, and sport; scientific data from biology, chemistry, astronomy and other scientific fields; as well as data presenting the activities of governments and other important institutions.

There is consensus that data should be presented in some form of graph data model where simple and natural abstractions are used to represent data as subjects and their properties described by objects, that is, by means of nodes and edges of a graph.

A number of practical projects that allow for gathering and storing graph data have been started. One of the most famous examples is Linked Open Data (LOD) project that gathered more than 32 giga triples from the areas such as media, geography, government, life sciences and others. The language employed for the representation of data is Resource Description Framework (RDF) which is a form of graph data model.

Storing and managing huge amounts of structured data represents a problem that could be compared to the problem of querying huge amounts of text that appeared after the advent of Internet. The differences are in the degree of structure and semantics that data formats such as RDF and OWL encompass comparing them to HTML.

Prospective authors are invited to submit original papers on topics including, but not limited to:

THEORY

Search in graph databases

Algebra and logic of graphs
Expressive power of graph query languages
Formalizations of graph databases

DATA MODELLING

Graph data modelling
Advanced graph data models
Data modelling for specific graph applications

STORAGE MANAGERS

Indexing methods for graph processing
Storage systems for large-scale graph databases
Automatic distribution and replication of graph databases
Storage managers for specific graph applications

QUERY PROCESSING

Flexible query answering on graph-structured data
Query processing
Intelligent distribution of query processing
Using map-reduce operations for graph processing

ANALYSIS AND MANAGEMENT

Graph pattern matching
Knowledge discovery from graphs
Algorithms for graph database processing
Analysis of graph databases from specific domains
Information retrieval on graph-structured data

APPLICATIONS

Biological and medical graph databases
Graph processing for Social Networks
Visualizing, browsing and navigating graph data
User-interfaces for graph databases

Important Datelines

- Inform the Chairs: As soon as you decided to contribute
Submission: April 7, 2019
Notification: April 27, 2019
Registration: May 5, 2019
Camera-ready: May 5, 2019

Note: These deadlines are somewhat flexible, providing arrangements are made ahead of time with the chair.

Contribution Types

- Regular papers [in the proceedings, digital library]
- Short papers (work in progress) [in the proceedings, digital library]
- Posters: two pages [in the proceedings, digital library]
- Posters: slide only [slide-deck posted on www.iaria.org]
- Presentations: slide only [slide-deck posted on www.iaria.org]

- Demos: two pages [posted on www.aria.org]

Paper Format

- See: <http://www.aria.org/format.html>

- Before submission, please check and comply with the editorial rules: <http://www.aria.org/editorialrules.html>

Publications

- Extended versions of selected papers will be published in IARIA Journals: <http://www.ariajournals.org>

- Print proceedings will be available via Curran Associates, Inc.: <http://www.proceedings.com/9769.html>

- Articles will be archived in the free access ThinkMind Digital Library: <http://www.thinkmind.org>

GraphSM Chairs

Dimitar Hristovski, Faculty of Medicine, Ljubljana, Slovenia

Andreas Schmidt, Karlsruhe Institute of Technology / University of Applied Sciences Karlsruhe, Germany

GraphSM 2019 Technical Program Committee

Patrick Appiah-Kubi, University of Maryland University College, USA

Wensheng Gan, Harbin Institute of Technology (Shenzhen), China

Reiko Heckel, University of Leicester, UK

Dimitar Hristovski, Faculty of Medicine, Ljubljana, Slovenia

Erik Hoel, Esri, USA

Martin Hoppen, Institute for Man-Machine Interaction | RWTH Aachen University, Germany

Yngve Lamo, Western Norway University of Applied Sciences, Norway

Andreas Schmidt, Karlsruhe Institute of Technology / University of Applied Sciences Karlsruhe, Germany

Herna L. Viktor, University of Ottawa, Canada

Jim Webber, Neo Technology, USA

KwangSoo Yang, Florida Atlantic University, USA

Yang Zhou, Auburn University, USA

Albert Zündorf, Kassel University, Germany

Paper Submission

<https://www.ariasubmit.org/conferences/submit/newcontribution.php?event=DBKDA+2019+Special>

Please select Track Preference as **GraphSM**

Registration

- Each accepted paper needs at least one full registration, before the camera-ready manuscript can be included in the proceedings.

- Registration fees are available at <http://www.aria.org/registration.html>
