BRAININFO 2020, The Fifth International Conference on Neuroscience and Cognitive Brain Information
   https://www.iaria.org/conferences2020/BRAININFO20.html
   October 18 - 22, 2020 - Porto, Portugal

This session is devoted to discussing computational models of evolving brain organization, which may contribute to the understanding of mental states, plastic changes, neurophysical regulation, among others.

We look for approaches dealing where a special attention is given to interpretable models that put strength on dynamic patterns of neural activation over temporal, spectral, and spatial domains.

Topics include, but not limited to:

- Spatiotemporal brain imaging data modeling (fMRI, EEG, MEG, fNIRS, etc.)
- Stochastic representations of neural population dynamics using latent variable modeling, complexity and chaos-related algorithms, theoretical learning
- Machine learning in interpretable models of neural dynamics
- Multimodal and multisubject modeling of group neural network activity
- System dynamics related to Media and Information
- Literacy, feedback, emotions, education, attention tasks, training, motor imagery, therapy for inducing recovery and neuroplasticity, neuro-rehabilitation therapy, motor learning as well as performance.
