June 21 - 25, 2020 - Valencia, Spain

Quality of Life (QOL) have been recognized as very important in the evaluation of healthcare. The World Health Organization (WHO) defines QOL as an individual's perception of their position in life in the context of the culture and value systems in which they live and in relation to their goals, expectations, standards, and concerns.

The concept of QOL affects wide area of health care. When developing equipments for not only patients but also medical facilities, developers have to consider for them to improve QOL. In this special track, we would like to invite researchers to submit original studies discussing equipments and/or methods improving QOL.

Topics expected, but not limited to:

- Prosthetic foot;
- Artificial joint;
- Patient monitoring or tracking system that enable patient to move freely;
- Rehabilitation devices or methods;
- Auxiliary tools for living;
- Wheel chair;
- Ambiental wellbeing.
