October 03 - 07, 2021 - Barcelona, Spain

Digital transformation refers to the adoption of online business models and the general shift of economic and social activity online, providing new ways in which government and businesses operate, the economies' function, and the way societies interact. It provides developing economies new opportunities to leapfrog industrial age infrastructure, to draw on the vast knowledge spillovers from the Internet, to take advantage of new markets offered by digital platforms and to exploit additional possibilities enabled by digital technologies in production and social sectors, from industry and agriculture to social services, settlement, and governance.

This special track invites submission on digital technologies and innovations on e-system that seek to promote development by making services available and accessible by the public. This include innovative digital solutions that promote adoption of digital technologies in agriculture, education, health, transport, governance, finance, commerce among other. This track will bring together attendees from both academia and industry to share their latest progress in e-system and digital technology, to identify open research problems, and technical challenges in e-system and digital technology.

Topics include, but not limited to:

- Smart Agriculture and E-Agriculture
- Smart cities and Smart transportation systems
- E-Learning and Digital Education
- E-Government and Public Service Delivery
- Technology-enabled Healthcare (mHealth / eHealth)
- Indigenous knowledge Preservation including local languages and culture
