eLmL 2023: The Fifteenth International Conference on Mobile, Hybrid, and On-line Learning
https://www.iaria.org/conferences2023/eLmL23.html
April 24 - 28, 2023 - Venice, Italy

With the evolution of users' digital experience, the massive migration of work and training experience to digital, as well as the centrality of information sharing, new training needs emerged and they require flexible and different training models and instructional design, models of engagement and governance, but also of enhancement of informal experiences.

New needs imply appropriate training models, formats, and technologies in harmony with different learning behaviour patterns with greater autonomy in both choice and "learning time" management, high wide-range of educational opportunities and content, maximum ease of access to resources, short duration resources, micro-timing applied, resource and knowledge sharing, and individualization of study.

In ISELI we want to investigate emerging learning needs, new training topics, possible instructional solutions, and new contents that could enhance users learning experience.

Topics include, but not limited to :

- Emerging & future learning needs
- New teaching models
- Innovative edtech
- Inclusion & accessibility
- Science & learning
- New topics in training
