AI Puts CIOs in the Spotlight, Right Next to the CEO

About 63% of U.S. technology leaders report directly to their chief executives, reflecting a record high driven by AI, according to a Deloitte survey.

An Interpretation of existing things

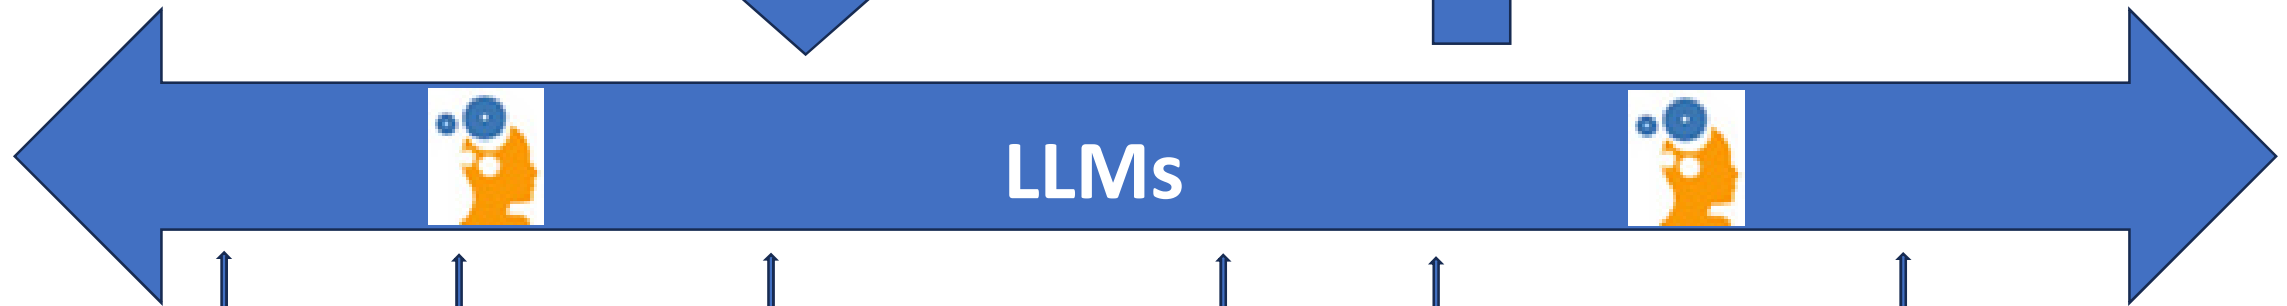

NICE
FALL 2024

Personalized (individual) brain-stored HumanPedia can not be captured (storage, access, meaning) as there are mostly suddenly awakened images leading to infinite narratives, each having associated with proper (induced) hallucinations

For this, there is a need of more than 8 Billions of LLMs, and counting!

Generative tools help to quickly and comprehensively summarize **existing** things/knowledge, adding more accuracy!

Powerless even in our vicinity

An impending nova event - Published June 19, 2024 4:00am EDT -

NASA predicts 'once-in-a-lifetime event' this summer that no one will want to miss

<https://www.foxnews.com/us/nasa-predicts-once-lifetime-event-summer-5-things-need-know>

An Earth-sized remnant of a dead star, located about 3,000 light years from Earth, will explode

1. The first recorded sighting of a "Blaze Star" nova was in the fall of 1217, when a German scientist noted a "faint star that for a time shone with great light," according to NASA.
1. Fast-forward to 1946, which was the last time the "Blaze Star" nova was seen from Earth, NASA said.

Monitoring and sanctions

Apple in breach of law on App Store, says EU

It is the first time a company has been found to be in breach of the Digital Markets Act (DMA).

European Union regulators have accused Apple of being in breach of new laws designed to rein in big tech companies.

The European Commission, which regulates competition in the EU, said Apple's App Store squeezes out rival marketplaces, marking the first time it has found a company in breach of the Digital Markets Act (DMA).

The firm faces a potential fine of up to 10% of its global revenue if it fails to comply with the rules.

The European Commission says that developers should be able to freely tell customers when there are cheaper app stores available beyond the one run by Apple.

The firm charges developers an average of 30% commission on its App Store.

Previously, it was told to allow alternatives in the EU in March.

<https://www.bbc.com/news/articles/c5111qxl2nro>

This focuses on three main areas:

A fee of €0.50 (£0.42) which Apple charges developers for every app downloaded outside of Apple's App Store

The number of steps which Apple puts in place for users who want to download apps from alternative stores

Whether Apple's eligibility criteria for alternative app store developers breaches the DMA

As of November 7th

FALL 2024

😊 Post-events (Nice, November 7th 2024)

The use of the **AI** label is misleading; It should be **Alternative Mechanisms** to get approximate output close to human brain output in similar situations

One cannot simulate something that we do not understand and accurately model

No knowledge is complete/enough until continuously and instantly updated

No LLM will be large enough; no need of them, either; since, thousands; then, LLM mismatching!

TinyLLMs ?

Infants, at a very early age, know with 100% accuracy some output in given situations; their LLM is very limited

No LLM output can guarantee this accuracy

Side note: the brain has ~86 billion neurons, each neuron has tens of thousands of synapses with various types of cells; each cell has 6-7 levels of membranes (controlled interfaces) and handles chemicals in terms of n/pGr and signals in terms of nV and nA.

Statements that 'humanity will disappear because of AI' are true human hallucinations

Let us identify, select, adapt to, and adopt what is useful from human activities, for humans!

Enjoy the Coming Days

NICE
FALL 2024

Caveat

All or some of us may be right, all or some of us may be wrong

but

Express yourselves!

A personal note:

Umberto Eco: "... "When men stop believing in God, it isn't that they then believe in nothing: they believe in everything"

Last from LinkedIn: AI helped LinkedIn surpass x.y million followers and triple connections among its members.

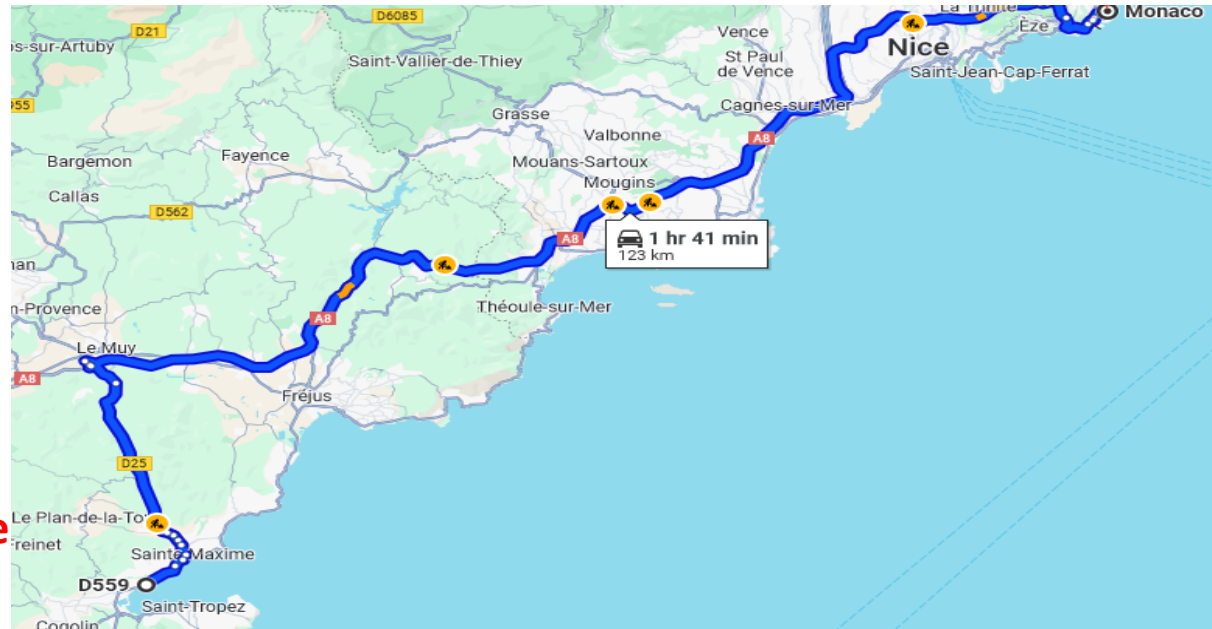

Enjoy the Coming Days
