Important deadlines:
Submission (full paper)    July 8, 2025
Notification                August 24, 2025
Registration               September 7, 2025
Camera ready               September 21, 2025

Tracks:

Hot research/industrial areas
Integration-centric design; Maintenance and (safe) evolution; Software quality assurance; Variability modeling; Empirical studies challenges in system integration; Effective live cloud migration; Big Data, Fast Data and Data Lake in system integration; Vulnerabilities in software product lines; Constraints for product lines; Integration via contract Interfaces; Interface-based similarity analysis in component-reuse; Component Interactions impact; Cyber-physical features in system integration; Reusable software strategies; Synchronizing software variants; Evolving software ecosystems; Component semantic similarity analysis; Security variability; Industrial lessons; Customer considerations on post-integration features

Process Integration
Software Dependency; Interfaces; System Integration; Tools and Techniques; Middleware; Communication and Protocols.

Data Integration
Data Exchange; Security, Privacy and Trust; Data Modelling and Database Design; Transformation.

Organizational Issues
Software Release Management; Software Migration; Third Party Software; Legacy Software; Software Testing; Software Architecture and Standards; Software Project Organization; Team, Organization and National issues.

Management and Control
Software Project Management; Costs and Benefits; Software Risk Management; Ownership and Control; Impact Analysis; Stakeholder Analysis; Complexity; Change Management

Modelling & Understanding:
Software Modelling; Expert Knowledge; Software Components; Software Understanding; Symptoms; Cause and Effect; Architectural Mismatch; Topology; Reverse Engineering; Multi-Paradigm Modelling; Abstraction; Motivation and Drivers; Assumptions, Awareness and Conflict; Model Transformation.

Programming and Design
Software System Design; Software Development Lifecycle; Programming Languages and Concepts; Patterns; Reuse

Applications
Case Studies; Choices and Trade-offs; Lessons Learned
