We cordially invite you to participate in the Special Track COLLAB at our upcoming ALLSENSORS conference, which focuses on disseminating results of collaborative research and innovations activities, such as those supported by Horizon Europe (footnote1).

Collaborative research and innovation bring together experts, researchers, institutions and enterprises to create new knowledge and results that may solve current and future problems. Results may also include new processes, products and services that can be adopted by organisations thus contributing towards improving efficiency and generating jobs and wealth.

This special track provides an opportunity to disseminate findings, generate insights and promote discussions around cutting-edge results from collaborative research and innovations actions. We encourage you to submit both long and short papers and idea papers. In addition, we look forward to demos and posters on current solutions being developed in academia or collaborations with industry.

Horizon Europe is the EU's key funding programme for research and innovation. Following the Multiannual Financial Framework Midterm Review (MTR) decision, the indicative funding amount for Horizon Europe for the period 2021-2027 is EUR 93.5 billion.
