Ilija Basicevic has been an assistant professor at the Department of Computer Engineering and Communications,

University of Novi Sad, since 2009. He teaches computer networking courses. He received B.Sc. (1998), M.Sc. (2001) and Ph.D. (2009) degrees from the Faculty of Technical Sciences, University of Novi Sad. His research interests are in the area of communication protocols in TCP/IP networks and network security.

He has worked on the implementation of network communication protocols (such as SIP, H.323, Bluetooth, etc.) and call processing services in telecommunication systems. His research has been focused on software architectures of communications systems, with emphasis on research of SIP-based call processing architectures. He has been the author or co-author of more than 30 journal and conference papers.

Ilija Basicevic has been involved with IARIA conferences since 2005. His contributions include publications, session chairing, paper reviewing and program committee memberships. He was a member of technical program committee of Advanced International Conference on Telecommunications (AICT) 2011, International Conference on Digital Telecommunications (ICDT) 2009-2012 and International Conference on Emerging Security Information, Systems and Technologies (SECURWARE) 2011-2012 conferences. Also, he is a member of editorial board of the International Journal on Advances in Security and International Journal on Advances in Telecommunications.
