

## **Prof. Dr. Alexander Lawall**

**Prof. Dr. Alexander Lawall** is the program director for the Bachelor's and Master's degree programs in Cyber Security and Cyber Security Management at IU International University and a professor of Cyber Security in both distance learning and on-site teaching. His areas of expertise include system and network security, web application and cloud security, security related to the Internet of Things (IoT), and industrial information technology.

Additionally, he is a member of the leadership committee of the "Management of Information Security" specialist group within the Society for Informatics (GI), the professional lead for "Security & GRC in IT" at Summit Leipzig, and a member of the Association of Cyber Forensics and Threat Investigators and the Zentrum Digitalisierung Bayern (ZD.B).

His research in the fields of information security and cyber security has resulted in national and international academic publications in professional journals and conference proceedings. The research areas include, among others, cyber security, information security, Industry 4.0, the Internet of Things, and rights management. The research results are also presented to the research community and the general public through lectures. He is regularly invited as a keynote speaker for various events.
