

Ali Recai Yekta

Ali Recai Yekta is a cybersecurity specialist with over 15 years of experience in penetration testing and security monitoring of IT and OT systems, particularly in the railway, automotive, and energy sectors. He has extensive practical experience in railway security and has conducted numerous offensive security assessments in operational environments.

As co-founder and Head of Cybersecurity at Yekta IT, he develops Security Operations Centers (SOCs) for critical infrastructure operators and leads interdisciplinary teams combining red and blue team capabilities. He regularly publishes on applied OT security and holds a master's degree in cybersecurity as well as certifications such as OSCP, OSWE, OSEP, and CRT0.
