Prof. Paul Martin

Paul Martin is an Adjunct Professor at the University of Maryland, Baltimore County, where he teaches a graduate-level Systems Engineering Principles class that qualifies as part of the INCOSE Academic Equivalency program. He is a retired Systems Engineer with over 40 years of experience where he has been everything from a product engineer for the General Electric Products Division to a software systems engineer for a multi-million-dollar Navy program and a systems engineer within the intelligence community.

He started a company called SE Scholar, which is dedicated to helping Systems Engineers get their INCOSE SEP certification. On the Certification side of things, he has three:

(1) INCOSE's "Expert Systems Engineering Professional" (ESEP),

(2) CompTIA's Certified Technical Trainer (CTT+), and

(3) a Systems Thinking Certificate from Cornell Institute for Public Affairs.
